

eMonday eMove360° Club Meeting March 2021
March 15, 2021 - 5p.m. CET

Jonathan Barrie
VP Business Development

For more than 43 Years has been developing, designing and manufacturing products that are straightforward, robust, easily integrated, reliable, simple to upgrade and easy to maintain.

Since 2018 Solcon has been researching & developing a Power Module for the e. mobility transformation & growth.

5th Element Power block is an innovative design using SiC MOSFETS as the evolution of existing IGBT technologies. Combined with an inventive control system for power delivery using proprietary Software (API) and not solely by Hardware (gate driver). This innovative approach to Power control empowers freedom to flexibly select power delivery from several paralleled power blocks simultaneously.

Jonathan Barrie presents here as part of Solcon Industries, a dynamic power electronics company that has been at the forefront of design, development and manufacturing of industrial electronic systems for over 40 years. He joined Solcon after 8 years of sales management and prescription consultancy at Schneider Electric.

At Solcon Industries Jonathan has held roles in Product Management, Sales and Marketing and Business development. His background provides breadth of knowledge and experience to present the fundamentals in addition to the solutions for the most challenging situation.
