8. MEV reserves the right to install the compressor for the compressed air supply on the stand or in the immediate vicinity of the stand (if only a limited supply of compressed air is required, for instance). No objections may be raised on account of, for example, noise disturbance caused by the compressor. The compressors are operated at a pressure of 10 bar. Insofar as a lower pressure level is required, a pressure-reducing valve must be installed and needs to be ordered separately. Compressed air connections up to 60 bar or nitrogen systems can also be ordered, for either of which, however, a separate quote must be obtained. The entire compressed air installation (incl. materials) is supplied to the exhibitor on a rental basis only. Please refer to the liability ruling set out under point 5 of the General Terms of Contract for Exhibitor Services of MEV for further details.

9. Munich Expo Veranstaltungen GmbH General Terms of Contract for Exhibitor Services are a constituent part of any contract concluded.
