According to the City of Munich's regulations on drainage, the quantities of noxious substances in discharges into the sewage network must not exceed those usual for households. If waste water containing oil and / or grease is to be discharged in quantities exceeding these, the waste water must pass through a grease trap.

We hereby order—in the name and for account of the registered main exhibitor—subject to the conditions of connection and delivery set out on page 2. Orders in the name of co-exhibitors are not possible.

Quantity	Item no.	Description	EUR
	38600	Capacity up to max. 30 l/min, incl. DN 50 pipework (usually sufficient for a commercial dishwasher)	1.550,00
	38601	If capacities of more than 30 l/min and / or pipework deviating from DN 50 in size are required, please indicate sizes. Capacity l/min: _____ Size of connection DN: _____	upon request

Please send this form to the Technical Exhibition Services Division four weeks before set-up begins at the latest.

Please note that the order for a grease trap does not include the main water connection. This must be ordered separately using form 5.1.

Important: A layout sketch must be submitted to order a grease trap.

Place, Date
Company stamp and legally binding signature of exhibitor

Connection and Delivery Terms

1. Exhibitors wishing to have a main water connection installed for their stands must order it from MEV and, if they produce, process or demonstrate at their stands goods containing grease and/ or oil, undertake to order a grease trap from MEV at least four weeks before assembly begins. The same applies to exhibitors using commercial dishwashers on their stands that complete a full wash cycle in **two minutes or less**.

If, after assembly has begun, MEV ascertains that an exhibitor with stationary or mobile catering operations has ordered a main water connection without a grease trap, although he should have ordered a grease trap under these connection and delivery conditions, the exhibitor shall agree to MEV installing a suitable grease trap at the prices valid for the fair without MEV receiving a separate order from the exhibitor. Both in this event and in the event that the order is placed less than four weeks before setup begins, MEV is entitled to charge for the grease trap required a late payment penalty of 50% of the price valid at the time, unless the exhibitor can prove that MEV has suffered less or no damage. If the installation of a main water connection with grease trap is not possible or is possible only at excessively high cost, MEV can prohibit the exhibitor from producing, processing or demonstrating goods containing grease and / or oil at his stand or from using commercial dishwashers that complete a full wash cycle in **two minutes or less**.

2. The items on page 1 include rental, installation and disposal costs for the grease trap, but not the main water connection (see form 5.1).
3. Grease traps are usually installed outside the hall and not inside the exhibitor's stand area.
4. All prices are net plus statutory VAT.
5. **MEV's General Terms of Contract for Exhibitor Services apply additionally.**
